ACOG Practice Bulletin No. 106. Intrapartum fetal heart
ACOG Practice Bulletin No. 106. Intrapartum fetal heart monitoring: nomenclature, interpretation, and general management principles

Fetal Monitoring - Evidence Based Birth
Maturity - Fetal heart rate monitoring Summary/This Guideline provides guidance for ultrasound and intrapartum fetal heart rate (FHR) monitoring as a fetal well-being assessment tool. The document provides background on electronic fetal heart rate-monitoring (EFM), definitions of... Fetal Monitoring Credentialing
of fetal heart rate monitoring principles defined by national consensus. Who are we? The Perinatal Quality Foundation (perinatalquality.org) is an independent, non-profit foundation whose mission is to improve the quality of obstetrical services in the United States.

Intrapartum Fetal Monitoring - American Family Physician

Normal Fetal Heart Rate During Pregnancy
Jun 14, 2011  At 40 weeks, it is a normal deviation from the normal fetal heart rate for preterm, about 120-180 bpm. There is also a slowing of the normal fetal heart rate in the last 10 weeks of pregnancy, though the normal fetal heart rate is...

Intrapartum category I, II, and III fetal heart rate

What is the “normal” fetal heart rate?
Jun 04, 2013  Recording of fetal heart rate (FHR) via cardiocography (CTG) monitoring is routinely performed as an important part of antepartum and intrapartum care. However, in several randomized trials it became evident that there is only limited efficacy in improving fetal outcome using CTG (antepartum) (Patterson & McCowan, 2004).

Review of Category I, II, and III Fetal Heart Rate
Fetal heart rate monitoring during labor was first described by Evory Kennedy, a British physician in 1833 (21). The objective of the tocotrace to detect fetal heart beat was invented by David Hills in 1917 and Joseph Delice in 1922 (20). Please cardiotocography to detect the fetal...

Fetal Monitoring During Labor - Michigan Medics
Nov 08, 2013  Fetal monitoring can be done in one form or another, has been around for a long time—one 350 years, in fact. Prior to the 1970s, a healthcare provider (usually a doctor, nurse, or midwife) would use a stethoscope designed for pregnancy (hosptial...Physiological CTG - Guideline
This guideline describes fetal monitoring using physiology-based CTG interpretation. It has been developed by the editorial board based on the experience gained from maternity units around the country. The committee establishes a consensus between the various units that it is important to understand how the technology functions as well as...Continuous monitoring of the baby's oxygen levels, breathing, and heart rate; The diagnosis of TTN is most often made after the baby is monitored for 2 or 3 days. If the condition goes away in that time, it is considered to be transient.
